

Neutrinos – The Accelerate Reinvent Company

Empowering insurers to harness the full potential of AI agents

brochure

>>> About Us

Neutrinos is a leader in intelligent automation, empowering insurance enterprises to harness the full potential of AI agents to autonomously execute and optimize complex business processes.

We are **The Accelerate Reinvent Company** - on a mission to help insurers reimagine business processes, drive continuous modernization, and unlock new possibilities with AI.

Founded in 2016 by three automation professionals, Neutrinos began its journey in Johannesburg and has since evolved into a global organization headquartered in Singapore, with offices across India, the UAE, South Africa, and the U.S.

Purpose-built for insurers, the Neutrinos platform is the only one of its kind designed to manage and orchestrate all agents, not just those built on Neutrinos. It unifies complex systems, enables cross-platform orchestration, and powers the agentic and autonomous workflows of tomorrow.

»» Why Leading Insurers Choose Neutrinos

Business Outcomes First

We align with our clients' strategic objectives and drive measurable impact, helping insurers achieve enterprise agility, faster time-to-market, and exceptional customer experiences.

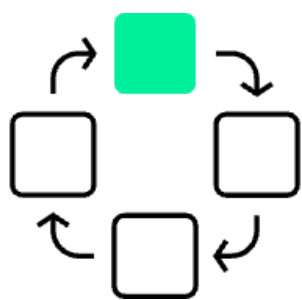

Deep Insurance Expertise

Our team combines deep domain expertise with proven technical prowess to solve the toughest challenges and meet evolving industry needs.

Innovation Without Disruption

Through our AI-Native Coreless System of Execution (CSoE), insurers can modernize confidently. Neutrinos integrates seamlessly with existing systems, unifying data, context, and action into a single, intelligent layer of execution.

Enterprise-Wide Reinvention

Neutrinos enables transformation at scale by breaking down silos, optimizing processes end-to-end, and powering sustainable agility across the insurance enterprise.

Together,

these strengths make Neutrinos the preferred partner for insurers ready to transform with confidence.

»» The Neutrinos Full-Stack AI Platform

The Neutrinos full-stack AI-native platform brings together automation, orchestration, and intelligence into one cohesive ecosystem. It's purpose-built to help insurers modernize without disruption, connecting legacy cores, enabling AI-driven operations, and driving continuous reinvention.

Unified Viewer: A single intelligent workplace for data visibility, collaboration, and execution.

AI Hub: Build, deploy, and manage AI agents, GenAI models, and predictive pipelines.

Digital Process Automation (DPA): Automate complex processes with human + AI collaboration.

Orchestration: Coordinate workflows, decisions, and systems across the enterprise.

Data Fabric: Harmonize and virtualize insurance data into a real-time, governed layer.

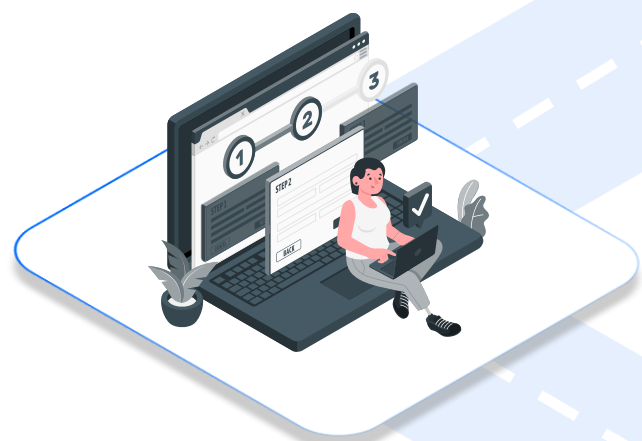

Trinity: Deploy anywhere: on cloud, on-prem, or hybrid, with built-in observability and control.

AI Agent Library: A catalog of prebuilt insurance agents for automation, decisioning, and engagement.

Together, these layers form a Coreless, AI-driven system of execution, enabling insurers to innovate continuously, safely, and at scale – without disrupting the system.

>>> A Look Inside the AI Agent Library

Our AI Agent Library spans six broad categories, with specialized agents designed to continuously expand insurance workflows and use cases.
